

6600 Series monitors and interphones programmed with “hands-free” functionality

From **October 2011**
monitors and interphones in the **6600 series with Due Fili technology**
will be factory set to operate in
hands-free mode.

List of items that will be factory set to operate in hands-free mode:

**6621, 6721, 662C, 6611, 6711, 661C
and relative colour variants**

**6601/AU, 6701/AU, 660C/AU, 6611/AU, 6711/AU, 661C/AU
and relative colour variants**

To change from **hands-free** to “**push-to-talk**” mode,
simply modify the “*open voice on-off*” parameter
using *programmer art. 950C* or the *Save-Prog* software for PC.

Monitors (among those listed above)
used for the assembly of **kits**
will also be produced with the *hands-free* function set by default.

Initially, items listed above and produced from October 2011
will be labelled on the packaging and on the back of the product
with a sticker indicating that the “*hands-free*” function is set by default.
