

Battery-powered photocell

art. EFA2

art. ZBA4

The application of **art. EFA2**, a pair of surface-wall mounted photocells, means it is possible to install a **transmitter** which can be powered **using a pair of stylus batteries art. ZBA4**.

Features of **art. EFA2**:

- pair of surface wall-mounted photocells
- adjustable between 3 positions (0°, +90°, -90°)
- transmitter which can be powered by 2 stylus batteries (art. ZBA4) or by a 12/24 AC/DC external power supply, selected via the jumper
- supplied with a terminal for connection of an external safety device (e.g. sensitive edge)
- over 15 months' battery duration
- "low battery" sound alert via buzzer

Features of **art. ZBA4**:

- pair of Lithium Thionyl Chloride stylus batteries
- 3.6 V - 2.7 Ah
- the batteries are only available in pairs
